

Actual Donor, Arielle

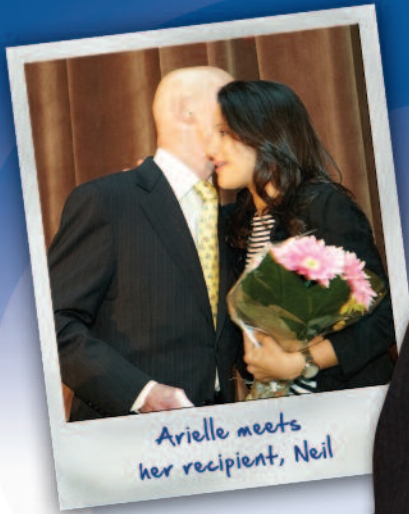

Gift of Life helps children and adults suffering from leukemia, lymphoma, other cancers and genetic diseases find matching donors for blood stem cell transplants.

Did you know...

- Gift of Life was the first registry in the world to recruit donors online via its website, back in 2000.
- Gift of Life was one of the first registries in the world to transition to the practice of fully typing donors at initial recruitment back in 2000.
- Gift of Life is the only registry in the world founded and directed by a transplant recipient.

A donation from someone like **YOU** allowed me to give the Gift of Life...

...and give me a second chance at life.

Arielle saved Neil's life

Gift of Life does not receive government funding to help offset the cost of testing. We rely on the generosity of your donations to allow us to continue our life-saving work. Testing each donors kit has a cost of \$54. Won't you sponsor a donor and help save a life?

## YES! I will sponsor a donor for \$54 per kit.

1 donor (\$54)    2 donors (\$108)    3 donors (\$162)    4 donors (\$216)    5 donors (\$270)    Other \_\_\_\_\_ donor(s) x \$54 = \$ \_\_\_\_\_

Enclosed please find my check payable to **Gift of Life Bone Marrow Foundation**.
